## I. INTRODUCTION

1. In the Maldives, while gender parity has been achieved in education, gender gaps in other spheres persist. The widest gender gap is in the gross national income (GNI) per capita, where women's GNI of \$7,454 is 48% of men's GNI of \$15,576. This gap could be attributed to gender division in the labour market, apart from the considerable proportion of women outside of the labour force (44% compared to men at 15%). Most women outside the labour force are not seeking jobs due to the need to care for the home and family. On average, women spend 6 hours (men, 3 hours) a day doing household work. Within the home, women have little control over household assets and face risk of domestic violence. Among women aged 15-49 years, 17% have experienced physical abuse and 11% sexual violence. Of these women, only 42% sought help.

2. Overall, 26% of Maldivian women (aged 15-49 years) believe that wife-beating is justified. In 2018, about 383 cases of domestic violence were recorded (347 females and 36 males); and in 2019, 433 cases (378 females and 55 males) with very few cases forwarded to court prosecutors. The alarming economic and social stress coupled with restricted movements and access to services due to novel coronavirus (COVID-19) exacerbates women's situation, particularly of those forced to lockdown with their abusers. Recent observations show that, if left unattended, gender inequalities and gender-based violence (GBV) could worsen because of increasing conservatism, which restricts women's mobility, strengthens expectations of conformity with traditional gender norms, and results in women's acceptance of limited agency.

3. The Maldives has put in place essential laws to promote gender equality, including the elimination of GBV, and to improve the well-being of its growing elderly population. These include the Domestic Violence Prevention Act (2012), which established the Family Protection Authority (FPA), the National Gender Equality Act (2016), the Child Rights' Protection Act (2019), and the Decentralization Act (2010), in particular its 8th amendment (2019) which sets a 33% quota for women's representation in island councils. For the elderly, the government approved a National Elderly Policy in 2017 and developed the National Elderly Action Plan in 2018. However, the implementation of these laws and policies has been hampered by the inadequacy of basic institutional requirements, such as the (i) lack of centralized management information system with sex-disaggregated data; (ii) lack of gender-responsive budgeting at central and decentralized levels; (iii) ineffective functioning of safe homes for abused women and children in 5 of the 19 Family and Children Services Centers (FCSCs) in Haa Dhaalu, Shaviyani, Thaa, Gaafu Dhaalu, and Male atolls; and (iv) lack of affordable child/elderly care services for low to middle-income Maldivians.

4. For these reasons the Government of Maldives with the financial assistance from Asian Development Bank have decided to implement the Strengthening Gender Inclusive Initiatives Project in Maldives, to address the gender equality issues in Maldives.

## II. DESCRIPTION OF THE PROJECT

5. The Strengthening Gender Inclusive Initiatives Project is a gender equality project which aims to reduce violence against women and reduce women's unpaid care burden by increasing access to sustainable services for survivors of domestic and gender-based violence, children, and the elderly.

6. The project is aligned with the Government's Strategic Action Plan, the Gender Equality Act 2016, the National Elderly Action Plan and the forthcoming Gender Equality Action Plan. The Project is funded by the Government of Maldives and the Asian Development Bank. It is a five-year project due to start in 2022. The Executing Agency is the Ministry of Finance, and the Lead Implementing Agency is the Ministry of Gender, Family and Social Services.

7. SGII is ambitious in scope and supports a number of strategic gender initiatives across a variety of ministries and agencies. This includes:

- (i) **Output 1:** Strengthening access to, the quality and use of sex, age and disability disaggregated data and gender statistics. Led by the Maldives Bureau of Statistics (MBS) and including support to Family Protection Authority (FPA).
- (ii) **Output 2:** The introduction and piloting of gender responsive budgeting. Led by the Ministry of Finance (MoF).
- (iii) **Output 3:** Strengthening the capacity of the social sector to deliver and provide sustainable services to survivors of domestic and gender-based violence, the elderly, and early age childcare. Led by the Ministry of Gender, Family and Social Services (MGFSS).
- (iv) **Output 4:** Improving the access of domestic and gender-based violence survivors to services through stronger referral and networks. Delivered through partnerships with civil society organisations (CSOs).
- (v) **Output 5:** Establishing three new stand-alone domestic and gender-based violence shelters. Led by the Ministry of National Planning, Housing and Infrastructure (MNPHI) and in partnership with the MGFSS, and the City and Island Councils where the infrastructure and services will be built and delivered. **Table 1** provides subprojects and locations under Output 5.

**Table 1: Subprojects and location**

Subproject	Proposed location
DV/GBV shelter	Ungoofaaru, Raa
DV/GBV shelter	Hithadhoo, Addu City
DV/GBV Shelter	Hulhumalé, North Malé

8. This land acquisition and resettlement due diligence report is prepared for the civil works components proposed at Hulhumalé under output 5 for the proposed Domestic Violence / Gender Based Violence (DV/GBV) Shelter. The scope of this report is limited to the proposed civil works for construction of DV/GBV shelter on the island of Hulhumalé. This due diligence report (DDR) is prepared based on the information available from several documents and field visit to the Island. The main objective of due diligence exercise is to confirm that the subproject is free of involuntary resettlement impact such as land acquisition, physical displacement, economic displacement, adverse impact on livelihood, community properties or any other impacts, based on a review of land records, consultations and field visits to proposed project locations. The DDR will be submitted to ADB for review and approval and the final document disclosed on IA and ADB websites. No civil works contract package will be awarded, or construction started before the

approval of final social safeguards document for the said package by ADB. The IA is responsible to hand over the project land/site to the contractor free of any encumbrance.

**III. LOCATION AND STUDY AREA**

9. The Hulumale DV/GBV Shelter is located in North Malé atoll. Hulhumalé is a reclaimed island located in the south of North Malé Atoll. The island is located [REDACTED]. The total area of the island is 4 km sq. The total population of Hulhumalé is around 50,000.

**Figure 1: Location of Hulhumalé, North Male**

**A. Proposed project**

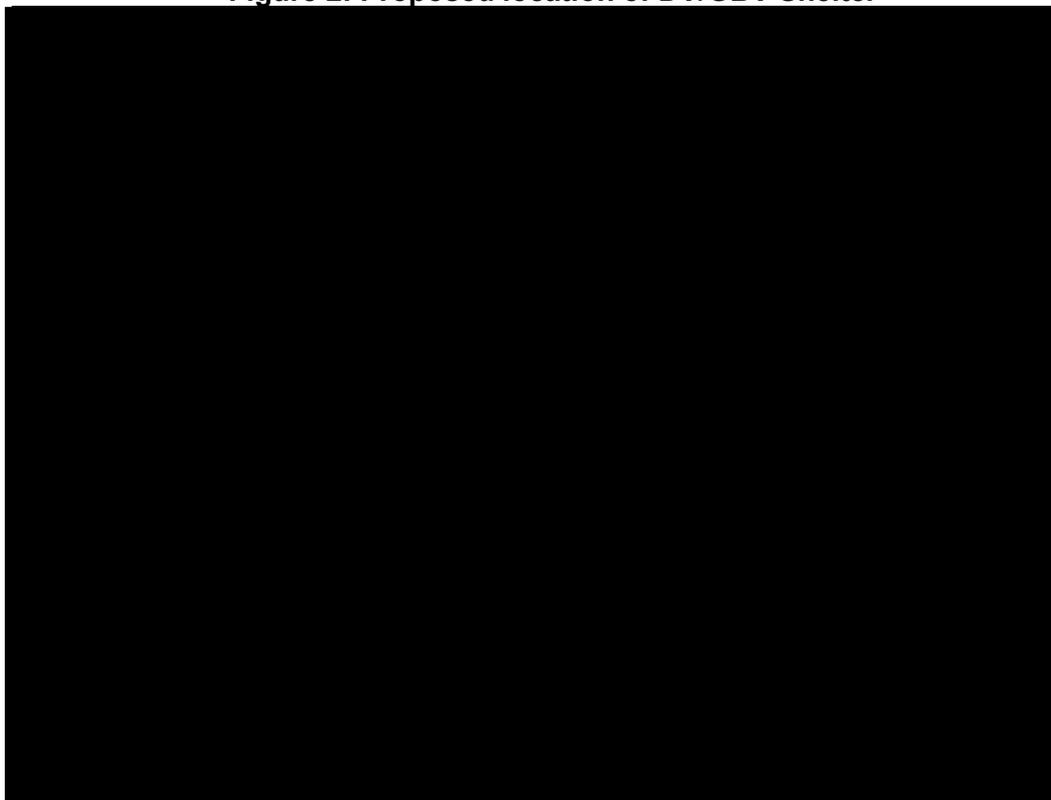

10. The Housing Development Corporation (HDC) has identified and allocated a site for the DV/GBV shelter around the center of the island. The Ministry of Gender Family and Social Services with the financial assistance from the Asian Development Bank proposes to build a DV/GBV shelter on the land proposed by the HDC. The size of the proposed site is 10,000 sqft.

[REDACTED]

and under construction of the proposed site. <sup>1</sup> High rise buildings are in around and under construction of the proposed site. **Figure 2** shows the location of the site and the surrounding area.

<sup>1</sup> [This information has been removed as it falls under the exception to disclosure in ADB’s Access to Information Policy, para. 17.5.(x)]

**Figure 2: Proposed location of DV/GBV Shelter<sup>2</sup>**

**B. Components of the proposed project**

11. The project proposes to construct a new DV/GBV shelter in Hulhumalé Island. This shelter will be used to house victims of DV/GBV from Hulhumalé and nearby islands. The DV/GBV shelter proposed for Hulhumalé will have the following components.

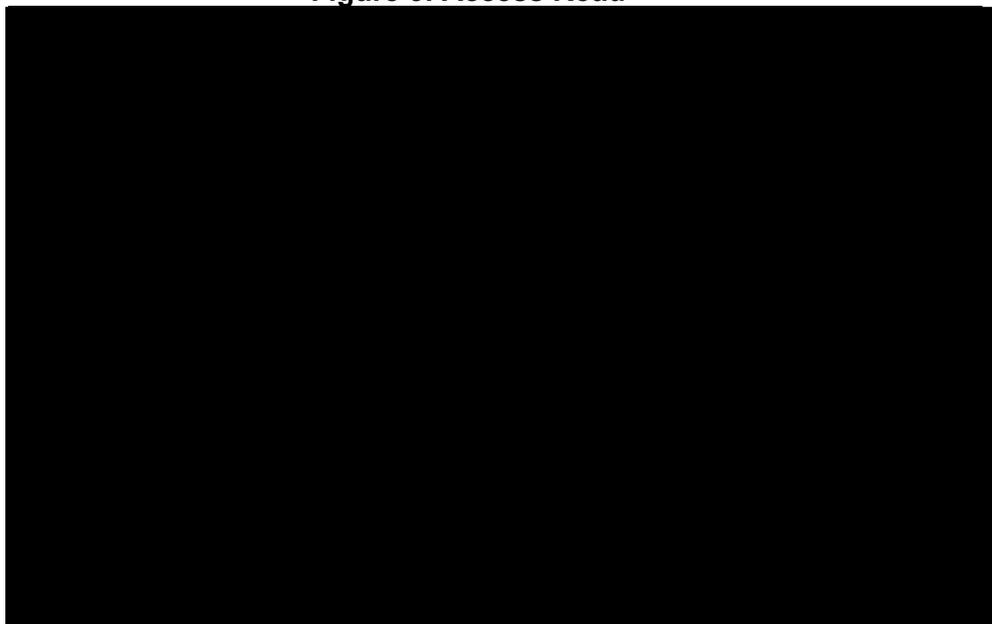

- (i) Public Zone with drop in and common services
- (ii) Semi Public Zone with indoor study/play area, daycare rooms, breast feeding rooms etc.
- (iii) Private Zone with accommodation, services, kitchen and office areas. Accommodation with 20 units is proposed.

**C. Access Road**

12. [REDACTED] The site has easy access to vehicles from the main roads. **Figure 3** shows the Banafsaa Hingun.

---

<sup>2</sup> [This information has been removed as it falls under the exception to disclosure in ADB's Access to Information Policy, para. 17.5.(x)]

<sup>3</sup>Figure 3: Access Road

#### D. Screening of Project

13. The proposed location of Hulhumalé DV/GBV Shelter was screened using ADB's Involuntary Resettlement Impacts Checklist. The exact location of the proposed facility has been finalized and the screening and due diligence reveals that the entire available government site for Hulhumalé DV/GBV meets the following involuntary resettlement related criteria – of no private land acquisition, no physical displacement, and no permanent livelihood loss or temporary impacts. The filled up Involuntary Resettlement checklist is given in **Appendix 1**.

#### E. Land Availability and Resettlement Impacts

14. The scope of the land acquisition and involuntary resettlement is assessed based on the site visit reports, consultations and in consideration of the design and site location. The Hulhumalé DV/GBV Shelter will be constructed on currently unused land, owned by the Government of Maldives. The land plot has been transferred by the HDC to the MGFSS. The land handover letter from HDC for the [REDACTED] for the Hulhumalé DV/GBV shelter is attached in the **Appendix 2**. No private land acquisition is therefore envisaged for the implementation of the proposed project components. The photographs of the location and site visit are given in **Appendix 3**.

### IV. SITE VISIT AND STAKEHOLDER CONSULTATION

15. Officials from HDC, MNPHI, MGFSS and ADB Mission visited the site on 5 June 2022. Prior to this site visit was carried out by the ADB national consultants along with HDC, MNPHI, MGFSS on 24 May 2022, after finalization of the proposed site.

16. Consultations took place between ADB staff, representatives of HDC, MNPHI and MGFSS during the visit. These consultations enabled the ADB, HDC, MNPHI and MGFSS to understand

---

<sup>3</sup> [This information has been removed as it falls under the exception to disclosure in ADB's Access to Information Policy, para. 17.5.(x)]

the condition of the site, and the willingness and enthusiasm of the HDC to establish the DV/GBV Shelter. Proceedings of the meetings, attendance sheets and photographs are given in **Appendix 4**.

**Table 2: Summary of Consultations**

<b>Date</b>	<b>Venue</b>	<b>Participants</b>	<b>Summary of discussions</b>
5 June 2022	Housing Development Corporation	19 Male:8 Female:11	The technical details of the proposed DV/GBV shelter, including the program, design principals, safeguard documentation was discussed.
5 June 2022	Meeting with residents	12 Male:3 Female:9	Expressed the need of having the shelter in the island. All the respondents acknowledged there is a problem of DV/GBV. They mentioned the need to create awareness on the DV/GBV as most are not aware that they are being subjected to DV/GBV.

#### **A. Stakeholder Consultation Meetings**

17. [REDACTED] Consultations were conducted with the residents of the island on 5<sup>th</sup> June 2022. The meetings were facilitated by Director General, MGFSS and Project Officer PMU/MGFSS.

18. Participants were briefed about the project and its objectives. Everyone consulted acknowledged there is a problem of DV/GBV in the community. They expressed that though DV/GBV was not happening in their homes, they knew of cases. All the respondents agreed there was an urgent need of the project.

19. All participants were informed about possible sound and dust pollution which may occur in the construction phase however they mentioned that they understood that any construction work would have pollution issues around the vicinity of the site, and they would have no issues about it and said that the project is necessary.

#### **V. CONCLUSION**

20. No involuntary resettlement impacts are anticipated due to the proposed civil works for the DV/GBV Shelter as per the due diligence review conducted. The civil works will be undertaken on vacant and unused land owned by Government of Maldives, after the transfer between HDC (a 100% government-owned enterprise) and MGFSS is completed. The assessed subproject components in this DDR are not anticipated to require acquisition of private land or involuntary resettlement impacts, permanent or temporary.

---

<sup>4</sup> [This information has been removed as it falls under the exception to disclosure in ADB's Access to Information Policy, para. 17.5.(x)]

**Table 3: Summary of Involuntary Resettlement Impacts of Hulhumalé DV/GBV Shelter**

Location	Component	Land Ownership (Gov./Private)	DV/GBV Shelter Land Area	Existing Land Use	Potential Involuntary Resettlement Impact
Hulhumalé	DV/GBV Shelter	Government land. Land now owned by HDC	10,000sqft	Unused plot	The proposed plot is presently a vacant and unused land area and is owned by the Government of Maldives and managed by the HDC. The land is in the process of being transferred to MGFSS (refer Appendix 2 for details). No land acquisition and involuntary resettlement impacts due to the project are anticipated.

**A. Next Step**

21. The DDR will be updated based on the final detailed design. Additional public consultation details will be included.

## Appendix 1: Involuntary Resettlement Impact Assessment with COVID-19 Screening Checklist

### A. Introduction

1. Each subsection/section needs to be screened for any involuntary resettlement impacts which will occur or have already occurred. This screening determines the necessary action to be taken by the project team.

### B. Information on subsection/section:

- a. District/administrative name: North Male Atoll
- b. Location (km): North Male Atoll
- c. Civil work dates (proposed): December 2023
- d. Technical description: Construction of DV/GBV shelter

### C. Screening Questions for Involuntary Resettlement Impact

2. Below is the initial screening for involuntary resettlement impacts and due diligence exercise. Both permanent and temporary impacts must be considered and reported in the screening process.

Probable Involuntary Resettlement Effects	Yes	No	Not Known	Remarks
<b>Involuntary Acquisition of Land</b>				
1. Will there be land acquisition?		√		The proposed plot is a vacant and unused land area and is government land.
2. Is the site for land acquisition known?				Not applicable
3. Is the ownership status and current usage of land to be acquired known?				Not applicable. Owned by GOM
4. Will easement be utilized within an existing Right of Way (ROW)?				Not applicable
5. Will there be loss of shelter and residential land due to land acquisition?				Not applicable
6. Will there be loss of agricultural and other productive assets due to land acquisition?				Not applicable
7. Will there be losses of crops, trees, and fixed assets due to land acquisition?				Not applicable
8. Will there be loss of businesses or enterprises due to land acquisition?				Not applicable
9. Will there be loss of income sources and means of livelihoods due to land acquisition?				Not applicable
<b>Involuntary restrictions on land use or on access to legally designated parks and protected areas</b>				
10. Will people lose access to natural resources, communal facilities and services?		√		
11. If land use is changed, will it have an adverse impact on social and economic		√		

activities?				
12. Will access to land and resources owned communally or by the state be restricted?		√		
<b>Information on Displaced Persons:</b>				
<b>Any estimate of the likely number of persons that will be displaced by the Project? Not applicable</b>				
If yes, approximately how many? ..... none Not applicable				
<b>Are any of them poor, female-heads of households, or vulnerable to poverty risks? Not applicable</b>				
Not applicable				
<b>Are any displaced persons from indigenous or ethnic minority groups? Not applicable</b>				

#### D. COVID-19 Risk Screening for Involuntary Resettlement Impact Assessments

Risk screening questions	Yes	No	Not sure	Remarks
1. Will project preparation be affected by the inability of experts/consultants, to visit the project site because of the pandemic?		√		On-site consultations and field visits were undertaken during project processing. ADB staff, consultants and representatives from the EA and IA took part during the site visits. For future consultations, project consultants, EA and IA will ensure that the up-to-date COVID-19 health and safety protocols will be strictly observed during activities in the field.  It is envisaged that holding consultations will not face difficulty, particularly virtual and small group meetings and individual (one-to-one) meetings. The PMU will ensure that consultations, meetings, focus group discussions, surveys and field visits to conduct safeguards activities, etc. will be undertaken with adherence to the latest COVID-19 protocols.
2. Is the project likely to face challenges in achieving meaningful consultation because of the pandemic? If yes, please clarify the types of consultations to be affected and at what stages in social safeguards planning and implementation.		√		
3. Is the project likely to face challenges in preparing safeguards assessments/planning instruments and/or implementing social safeguards plans because of the pandemic? Please be as specific as you can in the remarks section.		√		

Note: The project team may attach additional information on the project, as necessary.

### LAND HANDOVER

No: H-GOV-L/2022/10

With regard to the agreement no HDC/LDS/2022/75 signed on 18<sup>th</sup> August 2022 between Housing Development Corporation Limited (HDC) and Ministry of Gender, Family and Social Services and Ministry of Finance, HDC hands over the allocated land, [REDACTED] total area of 10,000.00 sqft to Ministry of Gender, Family and Social Services as per the Conditions below.

- All demarked coordinates must be checked and assessed for confirmation by the receiving parties and should be submitted to this corporation within seven days of handover.
- Please note that if the required documents are not submitted within working seven days, we will process that our plotted coordinates have been accepted by the party.
- The developer will fence the plot within 14 days from the date of land handover.

**Authorized by:**

Name: Shazim Saeed

Designation: Director

## Appendix 4: Stakeholder Consultations

### 1. HDC

Venue: HDC office Hulhumalé

Date 5<sup>th</sup> June 2022

Time 15:30-17:00

#### Meeting Attendees

Name	Designation	Office
Charlene Liau	Project Manager	ADB
Mahmood Riyaz	Environmental; Safeguard ADB (Local)	ADB
Rupa Banerjee	Social Safeguard	ADB
MateoMode	Climate Change Specialist	ADB
Sanober Durani	Environmental Safeguard (international)	ADB
Achutya Rao	Environmental Safeguard	ADB
Deb Thomas	Gender Consultant	ADB
Seetha Raghupathy	Project Architect	ADB
Ismail Murshid	Project Architect (local)	MFGSS PMU
Akram Hussain	Director General	MFGSS
Athifa Ibrahim	Gender Specialist (local)	ADB
Mariyam Shiuna	Project Officer	MFGSS/ PMU
Nasira Nasir	Quantity surveyor	MPHI
Fathimath Leena	Director General	MFGSS
Abdulla Madeeh	Business Development Officer	HDC
Amintha Riuman Wasif	Sen. Business development officer	HDC
Hassan Abdul Muhsin	Sen Env. Analyst	HDC
Ziya Zaki	Urban Planner	HDC

#### Discussion points

- After introduction of the participants, Charlene gave a brief account about the outputs of the project
- Matteo explained the overall climate resilient component of the project and how the building is going to be energy efficient, disaster risk resilient in the face climate change. The proposed building will be designed to take into impacts of climate change such as rainfall increase, temperature rise and sea level rise. And ADB wanted to show how they are going contribute to climate change.
- Achutya asked Mr. Hassan about his role in HDC as a senior environmental analyst. He said that his job is make sure that the development in Hulhumalé area climate change resilient, sustainable the development will have less impact on the environment as well as social impacts of the project. His section can develop EIAs as he can flag projects and development that requires EIA, IEE.
- ADB team expressed that they are proposing to have G +2 depending on the availability of financial resources.

- Most of the clarification on the design were asked by Seetha from ADB team based on the site-specific planning document HDC has provided.
- She clarified about the roof extending beyond the set backline towards the road? Asked for the exception to utilize the empty space
- HDC asked to send the comments and they will look into possible exemptions for the government.
- Asked about the boundary walls if it can be transparent, made of porous blocks and requested the minimum height required asked to provide a range?
- Asked for the leniency in parking space regulations
- With regard to utilities request a letter from HDC saying that the utility services will be provided
- According the rules of HGC service pipelines in the building cannot be exposed
- With regard to water during construction, HDC said special construction lines will be provided and contractor has to apply for it, the water is sourced from RO plants.
- The building will also have adequate water harvesting the storage must be sufficient for 5 days (20 litre/person/day) is the minimum rate of water consumption estimated.
- Firefighting requirement regulations needs to be provided to Seetha
- For garbage collection chutes can be constructed
- There is a current regulation /directive<sup>7</sup> from WAMCO on segregation of waste
- Seetha also asked about the minimum slope of the disabled people ramp, PWD access width, motor bike parking and disability access etc.
- HDC will check on the Minimal plinth level empty plot relaxation possibilities, railing height duct size etc. and exemptions.
- The safeguards team social and environment explained the information required for the completion of the safeguard documents.
- At the end of the meeting Seetha gave a presentation on the designed DB/GBV shelter in Addu Atoll.

## 2. Consultations with Hulhumalé Residents

Location: Hulhumalé

Date: 5<sup>th</sup> June 2022

Facilitators: Fatimath Leena, Director General MGFSS, Mariyam Shiuna, Project Officer PMU/MGFSS.

Consultations were held with individual residents in and around the Hulhumalé site. The persons were briefed about the project, its objectives and scope of works. Everyone consulted acknowledged there is a problem of DV/GBV in the community. They expressed that though DV/GBV was not happening in their homes, they knew of cases. All the respondents agreed there was an urgent need of the project.

One participant runs a Children’s Awareness Program through the Child Abuse Prevention Society. It is involved in advocacy and awareness program for parents and children. He mentioned 3-4 case are reported every month. The Society has a Hotline through which counselling is provided. All cases have to be directed to the MGFSS.
